

(2) Highly cited papers authored by eligible young researchers

As of October 2, 2025

39 papers

- Frontier Letter **33** cites

New GEONET analysis strategy at GSI: daily coordinates of over 1300 GNSS CORS in Japan throughout the last quarter century

Naofumi Takamatsu, Hiroki Muramatsu, Satoshi Abe, Yuki Hatanaka, Tomoaki Furuya, Yasuaki Kakiage, Kazuyuki Ohashi, Chiaki Kato, Keitaro Ohno and Satoshi Kawamoto

Earth, Planets and Space 2023 **75**:49

Published on: 6 April 2023

[Full Text](#)

[PDF](#)

- Frontier Letter **23** cites

Recent advances in earthquake seismology using machine learning

Hisahiko Kubo, Makoto Naoi and Masayuki Kano

Earth, Planets and Space 2024 **76**:36

Published on: 28 February 2024

[Full Text](#)

[PDF](#)

- Express Letter **15** cites

Coastal tsunami prediction in Tohoku region, Japan, based on S-net observations using artificial neural network

Yuchen Wang, Kentaro Imai, Takuya Miyashita, Keisuke Ariyoshi, Narumi Takahashi and Kenji Satake

Earth, Planets and Space 2023 **75**:154

Published on: 8 October 2023

[Full Text](#)

[PDF](#)

- Frontier Letter **12** cites

Anatomy of thermal unrest at a hydrothermal system: case study of the 2021–2022 crisis at Vulcano

Sophie Pailot-Bonnétat, Victoria Rafflin, Andrew Harris, Iole Serena Diliberto, Gaetana Ganci, Guiseppe Bilotta, Annalisa Cappello, Guillaume Boudoire, Fausto Grassa, Alessandro Gattuso and Michael Ramsey

Earth, Planets and Space 2023 **75**:159

Published on: 11 October 2023

[Full Text](#)

[PDF](#)

- Full paper **11** cites

[Simulation of horizontal sporadic E layer movement driven by atmospheric tides](#)

Satoshi Andoh, Akinori Saito and Hiroyuki Shinagawa

Earth, Planets and Space 2023 **75**:86

Published on: 16 May 2023

[Full Text](#)

[PDF](#)

- Full paper **10** cites

[Eight-year catalog of deep short-term slow slip events at the Nankai trough based on objective detection algorithm using strain and tilt records](#)

Suguru Yabe, Tadafumi Ochi, Norio Matsumoto, Satoshi Itaba, Yuichi Kitagawa and Takanori Matsuzawa

Earth, Planets and Space 2023 **75**:13

Published on: 28 January 2023

[Full Text](#)

[PDF](#)

- Express Letter **10** cites

[Impact of strong and weak stratospheric polar vortices on geomagnetic semidiurnal solar and lunar tides](#)

Sunil Kumar, Tarique A. Siddiqui, Claudia Stolle, Nicholas M. Pedatella and Duggirala Pallamraju

Earth, Planets and Space 2023 **75**:52

Published on: 10 April 2023

[Full Text](#)

[PDF](#)

- Full paper **9** cites

[Dual-frequency to five-frequency real-time precise point positioning using new BDS-3 PPP-B2b service](#)

Haochen Yang, Xiaodong Ren, Mingxiu Liu and Xiaohong Zhang

Earth, Planets and Space 2024 **76**:82

Published on: 11 June 2024

[Full Text](#)

[PDF](#)

- Full paper 8 *cites*

Bayesian earthquake forecasting approach based on the epidemic type aftershock sequence model

Giuseppe Petrillo and Jiancang Zhuang

Earth, Planets and Space 2024 **76**:78

Published on: 24 May 2024

[Full Text](#)

[PDF](#)

- Express Letter 8 *cites*

Laboratory measurements show temperature-dependent permittivity of lunar regolith simulants

M. Kobayashi, H. Miyamoto, B. D. Pál, T. Niihara and T. Takemura

Earth, Planets and Space 2023 **75**:8

Published on: 19 January 2023

[Full Text](#)

[PDF](#)

- Full paper 8 *cites*

Regional terrain-based V_{S30} prediction models for China

Yuting Zhang, Yefei Ren, Ruizhi Wen, Hongwei Wang and Kun Ji

Earth, Planets and Space 2023 **75**:72

Published on: 6 May 2023

[Full Text](#)

[PDF](#)

- Technical Report 8 *cites*

Small grains from Ryugu: handling and analysis pipeline for infrared synchrotron microspectroscopy

Stefano Rubino, Zélia Dionnet, Alice Aléon-Toppani, Rosario Brunetto, Tomoki Nakamura, Donia Baklouti, Zahia Djouadi, Cateline Lantz, Obadias Mivumbi, Ferenc Borondics, Stephane Lefrançois, Christophe Sandt, Francesco Capitani, Eva Héripré, David Troadec, Megumi Matsumoto...

Earth, Planets and Space 2023 **75**:4

Published on: 9 January 2023

[Full Text](#)

[PDF](#)

- Frontier Letter 7 cites

A brief review of single silicate crystal paleointensity: rock-magnetic characteristics, mineralogical backgrounds, methods and applications

Chie Kato, Yoichi Usui and Masahiko Sato

Earth, Planets and Space 2024 **76**:49

Published on: 29 March 2024

[Full Text](#)

[PDF](#)

- Full paper 7 cites

An experimental approach to unravel 2D ground resonances: application to an alluvial-sedimentary basin

Giulia Sgattoni, Giovanni Lattanzi and Silvia Castellaro

Earth, Planets and Space 2023 **75**:74

Published on: 10 May 2023

[Full Text](#)

[PDF](#)

- Express Letter 7 cites

Can we explain the post-2015 absence of the Chandler wobble?

Ryuji Yamaguchi and Masato Furuya

Earth, Planets and Space 2024 **76**:1

Published on: 2 January 2024

[Full Text](#)

[PDF](#)

- Full paper 7 cites

Deep subduction of the Philippine Sea slab and formation of slab window beneath central Japan

Kazuki Miyazaki, Junichi Nakajima, Nobuaki Suenaga and Shoichi Yoshioka

Earth, Planets and Space 2023 **75**:93

Published on: 26 May 2023

[Full Text](#)

[PDF](#)

- Full paper 7 cites

Measurement of ferric iron in Chang'e-5 impact glass beads

Lixin Gu, Yangting Lin, Yongjin Chen, Yuchen Xu, Xu Tang, Sen Hu, Ho-kwang Mao and Jinhua Li

Earth, Planets and Space 2023 **75**:151

Published on: 1 October 2023

[Full Text](#)

[PDF](#)

- Full paper 6 *cites*

BaHaMAs: a method for uncertainty quantification in geodetic time series and its application in short-term prediction of length of day

Mostafa Kiani Shahvandi, Siddhartha Mishra and Benedikt Soja

Earth, Planets and Space 2024 **76**:127

Published on: 4 October 2024

[Full Text](#)

[PDF](#)

- Express Letter 6 *cites*

Continuous monitoring of instrumental clock errors at 50 volcanoes in Japan based on seismic interferometry

Takashi Hirose and Hideki Ueda

Earth, Planets and Space 2023 **75**:50

Published on: 6 April 2023

[Full Text](#)

[PDF](#)

- Full paper 6 *cites*

High-resolution 3-D imaging of electron density perturbations using ultra-dense GNSS observation networks in Japan: an example of medium-scale traveling ionospheric disturbances

Weizheng Fu, Yuichi Otsuka and Nicholas Ssessanga

Earth, Planets and Space 2024 **76**:102

Published on: 31 July 2024

[Full Text](#)

[PDF](#)

- Technical report 6 *cites*

Photochemical and radiation transport model for extensive use (PROTEUS)

Yuki Nakamura, Naoki Terada, Shungo Koyama, Tatsuya Yoshida, Hiroki Karyu, Kaori Terada, Takeshi Kuroda, Arihiro Kamada, Isao Murata, Shotaro Sakai, Yuhei Suzuki, Mirai Kobayashi and François Leblanc

Earth, Planets and Space 2023 **75**:140

Published on: 15 September 2023

[Full Text](#)

[PDF](#)

- Full paper 6 cites

Post-midnight purple arc and patches appeared on the high latitude part of the auroral oval: Dawnside counterpart of STEVE?

Sota Nanjo, Gabriel Arne Hofstra, Kazuo Shiokawa, Atsuki Shinbori, Satonori Nozawa and Keisuke Hosokawa

Earth, Planets and Space 2024 **76**:55

Published on: 9 April 2024

[Full Text](#)

[PDF](#)

- Full paper 6 cites

Precise tilt measurement by seafloor borehole tiltmeters at the Nankai Trough subduction zone

Shuhe Tsuji, Eiichiro Araki, Takashi Yokobiki, Shuhe Nishida, Yuya Machida, Mark Zumberge and Keisuke Takahashi

Earth, Planets and Space 2023 **75**:188

Published on: 20 December 2023

[Full Text](#)

[PDF](#)

- Full paper 6 cites

Real-time earthquake magnitude estimation via a deep learning network based on waveform and text mixed modal

Baorui Hou, Yueyong Zhou, Shanyou Li, Yongxiang Wei and Jindong Song

Earth, Planets and Space 2024 **76**:58

Published on: 17 April 2024

[Full Text](#)

[PDF](#)

- Full paper 6 cites

Short-term prediction of celestial pole offsets with interpretable machine learning

Mostafa Kiani Shahvandi, Santiago Belda, Siddhartha Mishra and Benedikt Soja

Earth, Planets and Space 2024 **76**:18

Published on: 29 January 2024

[Full Text](#)

[PDF](#)

- Full paper 6 *cites*

The spatial properties of the site amplifications of S-waves by generalized spectral inversion technique and the correction method of the site amplifications considering the contribution of later arrivals after major S-waves

Kenichi Nakano and Hiroshi Kawase

Earth, Planets and Space 2023 **75**:65

Published on: 4 May 2023

[Full Text](#)

[PDF](#)

- Full paper 6 *cites*

Variations of precipitable water vapor in sandstorm season determined from GNSS data: the case of China's Wuhai

Shihao Han, Xin Liu, Xin Jin, Fangzhao Zhang, Maosheng Zhou and Jinyun Guo

Earth, Planets and Space 2023 **75**:126

Published on: 21 August 2023

[Full Text](#)

[PDF](#)

- Technical report 5 *cites*

A new GNSS-acoustic positioning software implementing multiple positioning functions considering nadir total delays

Fumiaki Tomita and Motoyuki Kido

Earth, Planets and Space 2024 **76**:48

Published on: 26 March 2024

[Full Text](#)

[PDF](#)

- Full paper 5 *cites*

Classification of the equatorial plasma bubbles using convolutional neural network and support vector machine techniques

Thananphat Thanakulketsarat, Pornchai Supnithi, Lin Min Min Myint, Kornyanat Hozumi and Michi Nishioka

Earth, Planets and Space 2023 **75**:161

Published on: 16 October 2023

[Full Text](#)

PDF

- Express Letter 5 cites

Climatology of mesosphere and lower thermosphere diurnal tides over Jicamarca (12S, 77W): observations and simulations

Jose Suclupe, Jorge L. Chau, J. Federico Conte, Marco Milla, N. M. Pedatella and K. Kuyeng

Earth, Planets and Space 2023 **75**:186

Published on: 14 December 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Comparison of tropospheric delay correction methods for InSAR analysis using a mesoscale meteorological model: a case study from Japan

Sardila Nurulhikmah Saillellah and Yo Fukushima

Earth, Planets and Space 2023 **75**:18

Published on: 2 February 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Equatorial spread-F forecasting model with local factors using the long short-term memory network

Phimmasone Thammavongsy, Pornchai Supnithi, Lin Min Min Myint, Kornyanat Hozumi and Donekeo Lakanchanh

Earth, Planets and Space 2023 **75**:118

Published on: 4 August 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Favorable locations for new VGOS antennas in India depending on the assessment of geodetic parameters and environmental factors

Sujata Dhar, Susanne Glaser, Robert Heinkelmann, Harald Schuh, Nagarajan Balasubramanian and Onkar Dikshit

Earth, Planets and Space 2023 **75**:47

Published on: 30 March 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Improving the accuracy of polar motion prediction using a hybrid least squares and long short-term memory model

Chenxiang Wang and Pengfei Zhang

Earth, Planets and Space 2023 **75**:153

Published on: 7 October 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Not too old to rock: ESR and OSL dating reveal Quaternary activity of the Periadriatic Fault in the Alps

Erick Prince, Sumiko Tsukamoto, Christoph Grützner, Marko Vrabec and Kamil Ustaszewski

Earth, Planets and Space 2024 **76**:85

Published on: 12 June 2024

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Optimal distribution of VLBI transmitters in the Galileo space segment for frame ties

Helene Wolf and Johannes Böhm

Earth, Planets and Space 2023 **75**:173

Published on: 17 November 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Performance of the double-thin-shell approach for studying nighttime medium-scale traveling ionospheric disturbances using two dense GNSS observation networks in Japan

Weizheng Fu, Yuichi Otsuka, Atsuki Shinbori, Michi Nishioka and Septi Perwitasari

Earth, Planets and Space 2024 **76**:7

Published on: 8 January 2024

[Full Text](#)

[PDF](#)

- Full paper 5 cites

Statistical analysis for EUV dynamic spectra and their impact on the ionosphere during solar flares

Shohei Nishimoto, Kyoko Watanabe, Hidekatsu Jin, Toshiki Kawai, Shinsuke Imada, Tomoko Kawate, Yuichi Otsuka, Atsuki Shinbori, Takuya Tsugawa and Michi Nishioka

Earth, Planets and Space 2023 **75**:30

Published on: 3 March 2023

[Full Text](#)

[PDF](#)

- Full paper 5 cites

The influence of anisotropic electrical resistivity on surface magnetotelluric responses and the design of two new anisotropic inversions

Wisart Thongyoy, Weerachai Siripunvaraporn, Tawat Rung-Arunwan and Puwis Amatyakul

Earth, Planets and Space 2023 **75**:12
