Scope of the Journal

Earth, Planets and Space (EPS) publishes across the broader geosciences, focusing on geomagnetism, aeronomy, space science, seismology, volcanology, geodesy, and planetary science. EPS also welcomes articles in new and interdisciplinary subjects, including instrumentation. Only new and original content will be accepted for publication. No review papers will be accepted.

Express Letter

New article type for rapid publication

Express Letters provide you with a fast turnaround time, while maintaining rigorous peer review. On March 7, the 1st Express Letter article (Nakajima & Matsuzawa, 2017) was published 42 days after the submission. Read more about submission guidelines and submit your article today!
